Fund Profile and Strategy

The Discovery Medical 2050 Fund is a uniquely structured fund designed specifically to meet the funding of postretirement medical aid contributions. The objective of the fund is to maximise the likelihood that there will be sufficient assets at retirement (around the year 2050) to provide for the required medical aid contributions for 20 years in retirement. To achieve its objective, the fund will aim to outperform the Post-Retirement Medical Aid Contribution Index.

The Fund is continually adjusted by Colourfield to ensure the correct balance between equity, comprised of the Discovery Top 40+ Fund managed by Discovery Life, and inflation-linked bonds, comprised of a long-duration bond fund and a short-duration bond fund, which are both managed by Colourfield. The ratio between the three funds, and therefore the risk profile of the fund, will vary over the investment term, following the group of investors who have a retirement date close to 2050.

Post-Retirement Medical Aid Contribution Index

The benchmark of the Discovery Medical 2050 Fund is the Post-Retirement Medical Aid Contribution Index, created by Colourfield and Discovery Invest. This unique tailor-made index is the first of its kind in South Africa and is endorsed by Nobel Laureate in Economics, Professor Robert Merton. The index tracks the value of the amount needed today to fund medical aid contributions for 20 years in retirement (after 2050). The calculation of the index takes into account Discovery Health Medical Scheme (DHMS) plan increases, inflation and long-term interest rates.

Contributions Required for Discovery Health Medical Scheme (DHMS) Plans

Shown below are the estimated lump-sum and recurring contributions required today in order to fund medical aid contributions for 20 years into retirement for either a principal only or a principal and spouse, assuming retirement in the year 2050. These figures will be updated from time to time in line with Discovery Health Medical Scheme plan increases and market performance. They can be used as an indication but are not guaranteed. They do not allow for the effects of Discovery Invest's Investment Integration, tax or financial adviser fees since these depend on personal circumstances, but we recommend that the amounts are adjusted to account for these.

Disability Protector

Upon early retirement due to a disability event, investors may be underfunded for their medical aid liability. The Disability Protector assists investors by providing a boost to their investment of up to 150%. The boost is calculated based on the value in the Discovery Medical 2050 Fund six months prior to the disability event. The size of the boost, shown in the table below, is dependent on the fund value and age at the time of disability, and is paid into the fund.

Medical Fund(s) value upon disability	Age upon event of disability		
	40 or younger	From 41 to 55	From 56 to 65
First R250 000	150%	100%	50%
Next R250 000	100%	60%	35%
Next R250 000	50%	35%	20%
Next R250 000	25%	20%	10%
Next R500 000	15%	10%	5%

Who Should Invest

The Fund is suited to investors looking to target their postretirement medical aid liability for 20 years in retirement.

Why You Would Select This Fund

Personalised investment approach - to meet your medical aid contributions for you and your family upon reaching your retirement age. The Fund is dynamically managed in order to maximise the likelihood of providing the postretirement medical aid contributions for 20 years starting on or around 2025. This means that the fund is rebalanced on an ongoing basis to allocate between an equity component and an inflation-linked bond component based on changes in fund performance, inflation, actual Discovery Health Medical Scheme (DHMS) increases and long-term interest rates.

Investment expertise - the manager of the liability-driven investment strategy, Colourfield Liability Solutions, is the largest provider of liability-driven investment strategies in South Africa.

Regulation 28 compliant - the fund complies with Regulation 28 of the Pension Funds Act which governs the maximum allocation a fund may have to risky asset classes.

Performance figures are calculated using the Total Returns Index (TRI) for a lump sum investment. The TRI is calculated by purchasing and reinvesting units on the declaration date at the Net Asset Value (NAV) price as at the reinvestment date. The TRI on any day is adjusted for NAV movements and dividend declarations. The performance is shown as net of asset management fees.

Specific risks of this investment

- Default - there is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.
- Derivatives - the use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.
- Interest rate - the value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.
- Third party operational - the Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.
