Funds Overview

The Discovery Multi Specialist Funds aim to achieve results that outperform their benchmark over the medium to long term. Each fund invests within the relevant risk profile.

The funds use a diversified portfolio of Discovery and specialist external funds and a sophisticated asset allocation model, developed by RisCura, to optimise return at the relevant risk level on an ongoing basis.

Funds Objectives

Discovery Multi Specialist Balanced Fund invests within an aggressive risk profile, optimizing investment returns and aiming to provide capital growth and income with moderate volatility.

Discovery Multi Specialist Moderate Balanced Fund invests within a moderate risk profile and aims to provide a balance of capital preservation and income.

Discovery Multi Specialist Cautious Balanced Fund invests within a cautious risk profile and has the highest allocation to income-generating assets within the Multi Specialist range.

Annual Management Fees

Ranges from **0.52%** to **1.22%** depending on the total assets the scheme has invested in the fund, with the fee decreasing as total assets increase.

Please note that Discovery Life Limited utilises a derivative trading strategy implemented with BNP Paribas in the Top40+ and EM+ funds ("the Plus funds") and will earn revenue from this derivative strategy. Historically, this has been equivalent to approximately 1% pa of the asset value of the Plus funds and this and any other trading costs incurred by BNP Paribas is not included in the TER of the fund, while the returns include the net result of the derivative trading strategy. The revenue earned is utilised to subsidise any other costs associated with the management and benefits of the Discovery Multi Specialist Balanced Fund range. The availability of the Plus funds is dependent on Discovery Life's ability to secure these derivatives in the future. Performance fees are not applicable.

1 - Performance is targeted over a full market cycle and is not guaranteed. 2 - This is the highest or lowest consecutive 12-month returns that the fund has experienced since inception. This is a measure of return volatility.
