Funds Overview

The Target Retirement Date Funds (TRDF) provide a dynamic investment vehicle to cater for the changes in the investor's retirement savings needs over their lifetime in a single fund.

Each fund is managed to cater for retirement near the stated date. The fund is also managed into the member's postretirement stage, allowing for a seamless transition from accumulation to drawdown. The profile of the fund's holdings thus evolves to reflect the stage of the investor's life.

Investment Strategy

The fund may invest in a variety of asset classes, subject to the limits imposed by Regulation 28 of the Pension Funds Act. The asset allocation within each fund will evolve over time from a focus on growth assets towards income-generating assets.

As the fund approaches the retirement date the manager is able to take advantage of tactical opportunities while making asset allocation transitions.

Annual Management Fees

Ranges from **0.80%** to **1.50%** depending on the total assets the scheme has invested in the fund, with the fee decreasing as total assets increase.

Performance is gross of annual asset management fees. Performance history before 1 July 2018 is based on monthly returns achieved since inception on the unit trust equivalent of each fund. Source: Fund performance - Discovery Life Collective Investments; CPI Data - StatsSA.

1 - Performance is targeted over a full market cycle and is not guaranteed. 2 - This is the highest or lowest consecutive 12-month returns that the fund has experienced since inception. This is a measure of return volatility.

Shorter-dated funds have lower performance targets but offer more stable returns profiles. They are more invested in bonds and cash - assets that usually have lower long-term expected returns but offer more volatility protection for members approaching retirement.
